> Hi, Williams,

> This is the Amendment filed on 20 Feb 2002:

> 2 (New) An illuminating instrument for illuminating a surface
> through means of an universal serial bus, comprising: a light source, an
> elongated universal

> serial bus wire coupled to said light source, a flexible stabilizing
> element connected between said light source an universal serial bus
> connector, which
> comprises of plurality of core-elements; a plurality of
> core-elements adapted to a universal serial bus connector.

> I suggest to correct the claim so that it is clearly thoughtfull as
> below:

4/22/02

>
> 2 (second amended) An illuminating instrument for illuminating a
> surface through means of an universal serial bus, comprising: a light
> source, an
>
> universal serial bus connector and an elongated universal serial bus
> wire which is configured with a flexible stabilizing agent for easily
> bendable, wherein
>
> the elongated universal serial bus wire includes a plurality of
> core-elements connected between said light source and said universal
> serial bus connector.
